APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Date of filing in State Engineer's Office MAY 7 1981						
Retu	rned to applicant for correction					
Corr	rected application filed Map filed SEP 2 9 1981					
The	applicant Salmon River Cattelmen's Association, Inc.					
P.(O. Box 1278 of Twin Falls. Street and No. or P.O. Box No. City or Town					
<u>Id</u>	Street and No. or P.O. Box No. aho 83301 hereby make application for permission to change the State and Zip Code No.					
	State and Zip Code No. Int of diversion and place of use of a portion Point of diversion, manner of use, and/or place of use					
of w	ater heretofore appropriated under Permit 11781 (Identify existing right by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and					
	fy right in Decree.)					
	The source of water is Cow Creek. Name of stream, lake, underground spring or other source.					
2.	The amount of water to be changed 0.52 cfs. Second feet, acre feet, One second foot equals 448.83 gallons per minute.					
3.	The water to be used for Irrigation. Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.					
4.	The water heretofore permitted for Irrigation Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.					
5.	The water is to be diverted at the following point NW SEL of Section 3. T. 46 N. R. 65 E. MDM at Describe as being within a 40-acre subdivision of public survey and by course and					
i	a point from which the NW corner of Section 4. T 46 N, R 65 E, MDM, bears N distance to a section corner. If on unsurveyed land, it should be stated. 65° 30' W 9342 feet					
6.	The existing permitted point of diversion is located within the NEL SWL of Section 3, T. 46 N. R. 65 E					
	MDM, at a point from which the NE corner of Section 4, T 46 N, R 65 E, MDM, bears					
	<u>N 30° 27' W 3274 feet</u>					
7.	Proposed place of use 51,99 acres within the attached place of use description. Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.					
	Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.					
8.	Existing place of use. Lots 2 and 3 and S½ NE½ of Section 4, T. 46 N, R. 65 E, MDM = totalian Describe by legal subdivisions. If permit is for irrigation, state number of acres irrigated. If changing place of use and/or					
	160.00 acres (see accompanying application to change for transfer of remaining manner of use of irrigation permit, describe acreage to be removed from irrigation.					
	acreage)					
9.	Use will be from April 1 to October 1 of each year. Month and Day Month and Day					
10.	Use was permitted from April 1 to October 1 of each year. Month and Day Month and Day					
	Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and					
	specifications of your diversion or storage works.) Earthen diversion dam and ditch system to					
	place of use					
12.	Estimated cost of works. Existing ditches constructed under Permit #11781					
13.	Estimated time required to construct works as above					

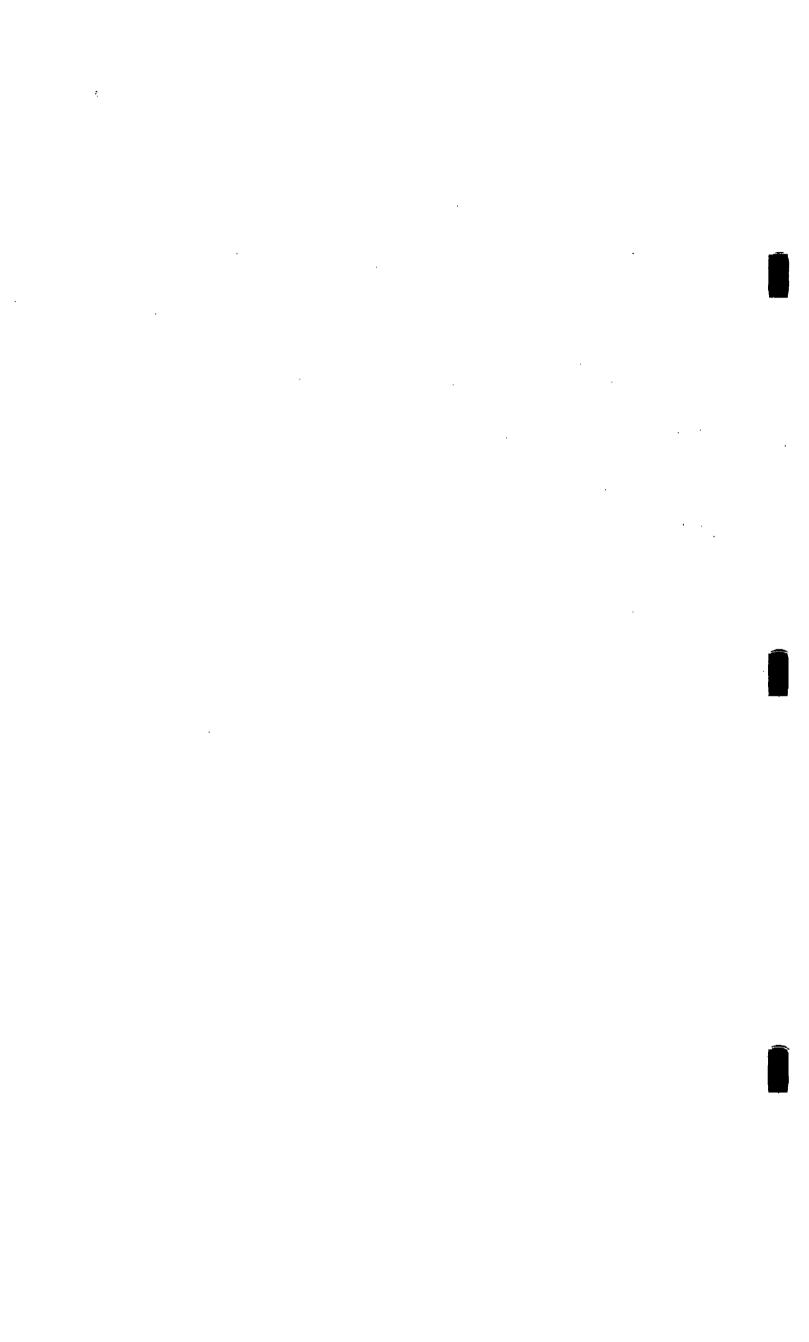

Remarks: For use other than irrigation or st consumptive use.	Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

Total 51.99 acres

The state of the s

Item #15 Remarks

There are three points of diversion displayed on the supporting map accompanying this application. The first two points are located as follows:

the first diversion is located in the NW4 NW4 of Section 11, T 46 N, R 65 E, MDM.

the second diversion is located in the NW4 SE4 of Section 3, T 46 N, R 65 E, MDM.

These diversions consume the entire flow of Cow Creek and its' storage, and transport water to the cultivated acreage displayed.

The third point of diversion located in the SW NE% of Section 4, T 46 N, R 65 E, MDM captures all the drain water that accumulated in the original streambed from upstream irrigation and re-diverts this water to downstream cultivated acreage. Beyond this third diversion, the streambed serves as a collection system and distributes this waste water to even lower irrigated acreages.
